

NATHAN HOR

MARKETING PORTFOLIO

Hi, I'm Nathan

I am a BSc Computer Science in Game Development & Multimedia graduate with practical experience in web development and digital marketing. I have built and managed websites using WordPress for Vexpress Logistics and my personal portfolio site, applying HTML, CSS, JavaScript, React, and jQuery to create responsive and user-friendly platforms. With over a year of experience in social media, email campaigns, and event marketing, I bring both technical expertise and strong content management skills. I am keen to contribute my skills and creativity to support impactful digital projects.

VERIFIAR - UNESCO HACKATHON 2025 PROJECT

verfiardemo.vercel.app

- End-to-End Development – Built a functional prototype using HTML and vanilla JavaScript, showcasing core web fundamentals without reliance on heavy frameworks.
- Interactive UI/UX – Designed a clean, user-friendly interface to demonstrate AR scanning concepts and fact-check overlays.
- Problem-Solving with Code – Implemented real-time logic for content verification and information display, proving ability to translate ideas into working features.
- Web Hosting & Deployment – Coordinated deployment on Vercel, ensuring fast, scalable, and reliable demo access.
- Cross-Functional Value – Combined technical coding skills, design thinking, and content coordination to bring an innovative misinformation-checking concept to life.

CONTENT & MARKETING OFFICER

Young Malaysian Engineers

- Developed and executed content strategies and marketing campaigns to promote MSTC'25 initiatives across LinkedIn and Instagram, driving audience engagement.
- Created visually impactful content and social media posts using Canva and Adobe Suite to support outreach and branding goals.
- Led t-shirt design projects, event booklets and other merchandise and contributed creative ideas in team meetings to align marketing efforts with overall brand messaging.
- Collaborated with cross-functional teams to ensure consistent branding and effective communication across all digital platforms

SOCIAL MEDIA LEAD

Gibbons Conservation Society

- Spearheading a cohesive, multi-platform content strategy, ensuring consistent, high-impact brand presence aligned with organizational goals.
- Leverages trend analysis tools, including TikTok Creative Center, to craft timely, culturally resonant campaigns.
- Transforming long-form YouTube content into optimised short-form formats for TikTok and Instagram, maximizing reach and engagement.
- Currently working on the #Singlikeagibbon marketing campaign to raise awareness about how gibbons are being poached while maintaining engaging content for audiences to interact with

PROBLEM

Worthing College website is not responding (404)

HOW DO WE SOLVE THIS?

WHAT IS ERROR 404?

HTTP status code returned by the server when a client (browser) requests a resource (Pages) that **does not exist** at the specified URL.

ACTION PLAN

Verify the issue

- Check the website on different browsers and devices to confirm the 404 issues

Check server/
hosting status

- Access host dashboard to see if server is up

Review logs

- Look at error logs (CMS logs) to identify if it's a misconfiguration, broken link, or downtime.

TEMPORARY MEASURE

Configure a custom 404 page or set up a redirect to a static holding page. That way, visitors aren't left with a broken screen. They see a clear message and alternative contact info while we fix the issue.

We're experiencing technical issues. Please check back shortly or contact us at info@chichester.ac.uk.”

Website Under Construction

Thank you for visiting the official JagaMinda website.

We're working hard to bring you something great.
